

Application Specialist at PoolD Diagnostics Ltd

An academic-led diagnostic venture to fight COVID19 (and beyond) is looking for talented application specialists to support our ongoing efforts to increase COVID-19 diagnostic testing capacity in Israel. Our first generation product is now being used in diagnostic laboratories in Israel as part of a nationwide COVID-19 testing initiative funded by the Israeli Ministry of Health.

For additional background see www.poold-diagnostics.com and the following: [New York Times](#), [Scientific American](#), [BBC](#) and [Haaretz](#)

Responsibilities

- Perform experiments in clinical diagnostic labs
- Train and provide on-site support to clinical lab technicians to use our pooling method at various sites across Israel

Requirements

- MSc in life sciences or biotechnology
- Experience in conducting laboratory experiments
- Excellent verbal and written communication skills
- Exceptional team player and inter-personal skills

Advantages

- Experience in molecular biology methods including PCR
- Experience with liquid dispensing robots.
