

### **R&D Manager at PoolD Diagnostics Ltd**

An academic-led diagnostic venture to fight COVID19 (and beyond) is looking for early joiners. We have algorithms, robots, and labs, and need a versatile go-getter to build and lead our software R&D team. Our first generation product is now being used in diagnostic laboratories in Israel as part of nationwide COVID-19 testing initiative funded by the Israeli Ministry of Health.

For additional background see the following:
